Tips:

You can choose the Vacuum button, then press on Start/stop button to process vacuum pump only.

After vacuuming and blending are finished, please lift the vacuum outlet (silicon) on the Lid for releasing the air pressure, ONLY then you can open the Lid from the Mixing jar.

● Blending Tips

- Please make sure the Lid is fit on the Jar in good position, or the vacuum job won't be processed efficiently.
- When pouring the food materials into the Jar, please be aware of the order. Please put liquid type of food and soft food material 1stly, then put ice, then add solid food materials.
- During blending process, if the food materials are been pushed toward the Jar wall, it means the RPM is too high, speed should be reduced. On the other hand, if the food materials are moving above the blade, it means the speed is too slow, needs to increase speed.
- This blender is equipped the overload protective switch in order to protect the motor in overload situations. Please wait until the motor has cooled off (can use fan to blow the base cooled off), then turn on the appliance to restart.
If the motor doesn't have enough cooling, then the machine probably can not be started or start for a short time then got shut off again.

Cleaning and Maintenance

1. When cleaning, make sure the power switch is in OFF position and pull the power plug from the electrical outlet.
 2. Cleaning the JAR: fill with clean water, turn on the PULSE switch for 10 seconds, then shut off and flush inside Jar with tap water.
 3. Use sponge or cloth to wipe the JAR and LIDS, dry them thoroughly to prevent odor or bacteria from growing.
 4. DO NOT put your hands into the JAR to clean the blades. The sharp blades will easily cause hurt to your hand. Do so only when the blades are disassembled from the JAR.
 5. Use dry cloth to wipe the transmission axle and motor base, NEVER flush with water.
- In case of difficult in cleaning, use neutral detergent to wipe, and then a dry cloth to rub clean.

SAFETY INSTRUCTIONS

1. Please read all instructions and operating procedures.
2. Make sure the power is 220V-240V 13amp
3. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
4. DO NOT allow children to play with or use this appliance. Keep them at a safe distance from the appliance while operating to prevent any contact leading to an accident with the machine.
5. Please be well noted that for safety reason, the appliance won't work without the Sound enclosure to be closed at position.
6. This appliance is designed for cold mixing only, do not fill in any ingredients with temperature higher than 60 degree.
7. Ensure the Lid fits in position for processing vacuum pumping efficiently.
8. Do not put any metal items like knives, forks, spoons, etc. into the JAR.
9. Do not let the appliance dry-blending(run without any liquid inside the JAR) for more than 90 seconds, since dry-blending create extremely high temperature in a short time, may cause damage to the lubrication system of the machine.
If necessary, you can apply dry blending for one minutes, stop for 1 minutes, then apply dry blending again.
10. In case the blade looses or broken, please stop operation the blender. Then contact with distributor or factory technician.
11. When cleaning or disassemble the parts, please remember to turn off power and unplug.
12. Do not wash the Blender base with water or soak it into the water to prevent electricity shock. Do not flush water into the vacuum hole on the blender base – that may cause your appliance's malfunction.
13. Do not immerse the JAR into water or put inside a dishwashing machine, it will cause rust on the bottom of the blades assembly, then cause damage to the machine gradually.
14. Do not clean the blades with your naked hands, they are very sharp. Instead, use a brush or a thick cloth for cleaning.
